

About Us

Rivon Plastic Color Printing & Packing (HK) Ltd. was found in the early of 1990s with its headquarters in Hong Kong. The production base is located at the nearby Foshan city of Guangdong Province of China, which is the centre of the heart of the economic booming Pearl River delta area.

As one of the leading manufacturers in the packing and color printing industry, Rivon provides services from design, plate-making, color printing, lamination, film-cutting and pouch making to finished product. Our main products are plastic packing film, labels & bags on such different materials as PET, PVC, PP, PE, OPP, CPP, 100% Corn Starch, Static Film and Aluminum Foils. Our products category covers shrinking film, multi-layer aluminum foils compounding bags, biodegradable plastic bags, high-temperature steam boiling bags, low-temperature resistance bags, vacuum bags, liquid bags and zip lock standing bags. These products are widely used in industries like food, daily necessities, cosmetics, and farm chemicals, pharmaceutical and medical industries.

We have been keeping abreast with the latest manufacturing technology and follow the development trend of the printing and packing industry. We are customer-oriented and centered in design and production. Our company is accredited with standards like ISO 9001 and ISO14000 International Quality Certification & Quality Safety Certification. Our sales network covers Europe, Japan, South America, Australia, Africa and recently we have succeeded in exploring North American market.

We cordially welcome your query about our products and possible OEM and ODM orders of your particular requirement. Our operation value and the fundamental principle have always been constant, i.e. to create value for our customers in their market by meeting the customer demands to the highest standard and keeping our customers satisfied by providing quality product, competitive price & excellent service.

(1)凹版彩印机

公司拥有先进的8色凹版印刷机，配有性能优越的电脑自动彩色套位系统和在线显示系统，印刷速度达180米/分钟；其轻轴控制系统保证能在小张力条件下高速印刷塑料、纸张等不同材料；并拥有紫外套印检测器等先进的数字化管理系统，确保优秀的印刷品质。

(1) Rotogravure Printing Sets

Our company owns 8-color rotogravure printing sets with an advanced computer-controlled color registration system and online display system. Maximum speed of these machines exceeds 180 meters per minute. The light axle control systems of these machines guarantee high-speed printing on different materials. We are also equipped with ultraviolet chromatographic detectors and other advanced digital management systems that guarantee printing quality.

(2)复合机

公司引进多台干式复合机和挤出复合机，可生产各类不同结构的高质复合产品，如：OPP/CPP, OPP/VMPET/CPE, PET/AL/CPP, NY/LLDPE等。上胶均匀，复合牢度高，不分层，复合面平整不起皱。

(2) Laminating Machines

We imported several dry mode laminators and extrusion mode laminators which are suitable for the production of high quality composite products in various structures, for example, OPP/CPP, OPP/VMPET/CPE, PET/AL/CPP and NY/LLDPE. It features even gluing, reliable laminating, never delaminating, flat laminating surface, no creasing etc.

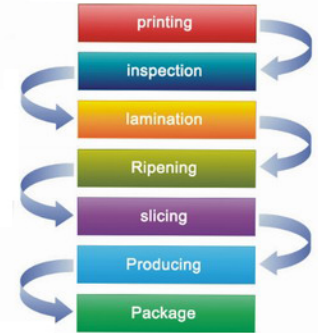

(3)分切机与高速制袋机

公司从日本及国外购置多台不同种类的制袋机、拉链机和分切机，全部具备自动化系统，将包装材料分切或制袋成形，完全满足了不同企业的装填工艺之需。先进的设备能生产的塑料包装袋品种繁多，如背封袋、中封袋、边封袋及自立拉链袋等，并提供不同形状及大小的挂孔和撕口。

(3) Slitting Machines & Pouch Making Machines

Our pouch making machines, zipper fastener machines and slitting machines cut the packaging materials and put them into pouch form. These advanced equipments can make a variety of plastic bags such as three-sided bags and self-standing zipper fastening bags. These machines also make tear-notches and holes of various shapes and sizes instantly.

食品包装袋

食品包装是各类包装中，种类最多也最复杂的一类，对不同食品又有不同的要求，如膨化类食品既要防潮又要保香还要防腐防变质；因月饼，腊肉，板鸭，板鸭等食品含油量高，所以对包装的要求除了具一般的特性外，还要求包装袋的阻隔性好，以防止食品被氧化而发霉变质，而如饼干，糖果，凉果及其他休闲小食外包装的印刷更是精益求精，以期达到吸引顾客，提供消费者购买欲。袋形更是千变万化，新品种层出不穷。

Food Pakaging

Food packaging bag has most varieties and is most complicated among all packaging. Different foods have different packaging requirements. For example: for expansive foods, it is required to prevent damp, keep fragrance and prevent mildew; for moon cake, preserved pork, chicken and duck which contain more oil, besides common features, the packaging bag shall have favorable oxidation prevention performance for preventing oxidation and mildew; others, such as biscuit, candy, preserved fruit and other snacks have the requirements to achieve perfect printing for attracting clients and improving appetite and purchasing desire of consumers. And there are different shapes of bags with numerous new varieties.

无缝接四边封风琴袋

无缝接四边封风琴袋是我司通过工艺改进而开发出来的一种新型包装，特点是成形的袋子四周无缝接，保持了正背面的完整性，使图案不再象传统的中封风琴袋那样，背面的图案因有背封边而遭到破坏，使袋子更显高档，完整，可用于饼干，芝麻糊，豆奶粉，麦片等外包装袋。

Seamless Four Sides Gusset Bag

Seamless four sides gusset bag is a kind of new type packaging bag developed by our company after improving the technique. It features seamless around bag and keep integrated patterns in front and rear parts, which is different from traditional middle seal gusset bag whose pattern will be destroyed since there is seal edge on rear part, therefore, the bag appears with higher grade.

直立拉链袋和吸嘴袋

直立拉链袋，可重复开启，方便保存，防止剩余内容物受到污染，具有良好的环保性。

吸嘴袋可用于全自动、半自动或手动等的冷灌装或热灌装，并可耐100℃以下高温杀菌，是现时与今后饮料，包括果汁、液体牛奶、果冻、含酒精饮料等的最佳包装容器。

Pouch with zipper & Spout Pouch

The pouch with zipper gives the convenience of repeated opening and closing. It prevents the remaining contents from being contaminated. It is also environment

Spout pouch bags can be used in automatic, half-automatic and manually operated packing machines. It can stand up to temperature sterilization up to 100 degrees and it is the ideal packing methods for juice, liquid milk, jelly and alcohol drinks currently and the years to come.

卷膜

卷膜是适用于有自动包装机的客户，可根据客户的需要分切成不同的宽度，长度，以适应客户对不同物品包装规格的需要，广泛应用于食品，化工，工业品等产品的包装。

Packaging Film in Roll

The packaging roll film is suitable for the client with auto-packaging machine. It can be cut into different sizes according to client's requirement. The packing roll film is well used for food, daily necessities, farm chemicals and medical industry, etc.

Products Varieties and Introduction

产品分类及介绍

珠光膜

珠光膜由于具有一定的珠光效果，常常用在冷饮包装如：冰激凌、热封标签、甜食、饼干、风味小吃包装。以及用于饮料瓶标签（如可乐瓶标）、洗洁精瓶标签等广泛应用。

BOPP Pearlized Film

BOPP pearlized film gives shining pearl effect and is frequently used in cold drink packing, ice cream, thermal sealed packing, sweets, biscuits and flavored snaps etc. It is also widely used drink bottles like Coca Cola and washing detergents etc.

啤酒标签

材料：可根据客人要求选择湿强纸，镀铝纸，镜面铜版纸和铝箔。

Beer Label

Material: wet strength paper, metallized paper, mirror coated paper and aluminum foil paper are for your choices.

沐浴用品包装袋

这是供给日本客户沐浴用品专用包装袋。液体袋，具有优良的气密性和复合强度，阻隔性好，防渗透性能好，不会出现破裂、渗漏现象，其使用性能可与铝罐、利乐包、PET瓶等饮料容器相当，且具有方便饮用、质量轻、材料耗用少、方便运输等其它容器不能具备的优点

Shower Wrapping Bag

This shower wrapping bag is for Japanese client. Liquid packing bag has good air tightness and high compound strength. It can stand up to pressure of over 50kg without rupture and leakage. Its performance are similar to the aluminum tins, PET bottles etc with such features as convenience, light weight, low material usage and easy transportation etc. It is widely used in chemical, food, juice industries etc.

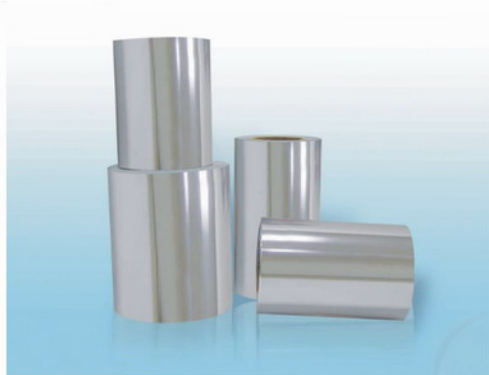

化妆品或卫生巾包装

化妆品或卫生巾包装多数采用亚光膜印刷，也可选用PET或者BOPP膜印刷，用铝箔或者镀铝膜复合，使产品的品质得到更完好的保护。

Cosmetic & Sanitary Towel Packing

The cosmetic packing products are usually printed with matte film, or PET or BOPP films. When compounded with aluminum foil or aluminum coated film, its performance in content protection is even better.

光膜系列

我们提供PVC膜，PET膜，BOPP膜，镀铝膜和铝箔等。

Clear Film

We also supply the PVC film, PET film, BOPP film, Metallized film & Aluminum foil for your choice.

彩色纸盒

彩色纸盒广泛应用于食品，日用品，农药医药及化工等行业。

Color Paper Box

Color paper boxes are widely used in industries like food, daily necessities, farm chemicals, pharmaceutical and medical industries.

PVC PET OPS POF 热收缩标签

包括电池收缩标签，铅笔收缩标签，水彩笔收缩膜、饮料收缩标签，矿泉水热缩膜、化妆品瓶收缩标签，油瓶收缩标签，适用于各类异形瓶直身瓶包装及瓶口的封口等等，产品透明度高，厚薄均匀，可根据客户的要求进行各种图案的印刷，色彩丰富。

PVC PET OPS POF Shrink Film

The shrink wrap are used for packing for such products as batteries, pencil, water-colour brush, beverage/water bottle, cosmetic products packing and oil bottles. These labels and films are suitable for packing for both stand straight bottle and nonstandard bottles with various shapes of bottlenecks. They have such good features as good transparency, even thickness and better aesthetic. The pattern of printing can be set to cater for the customer requirement with various rich colors.

铝箔袋/镀铝袋

可分为纯铝包装袋，镀铝包装袋，防静电包装袋，具有隔氧、屏蔽、防潮、遮光，耐刺穿性和优良的热封性。咖啡袋一般选用铝箔复合包装，能防止紫外线辐射，保香，保味，能长期保证咖啡的品质不变。

Aluminum Bag /Metallized Aluminum Bag

There are different categories: aluminum foil bag, aluminum coating bag (metallized aluminum bag), and anti-static packing bags. Such bag has the features as oxygen isolation, shielding, damp proof, light shielding, anti-penetration and good thermal sealing properties. Laminated aluminum foil is usually used in coffee bags. This packing can prevent the coffee against UV radiation and keep the smell, taste and quality of coffee for long-term

Products Varieties and Introduction

产品分类及介绍

全生物降解袋

产品特点: 产品易被微生物分解、且天然抗静电、自身开口性能好, 着色性能好、热合效果佳。全生物降解袋可在3个月的时间里在土里或垃圾场完全生物降解并对作物生长无任何毒副作用, 最终分解成CO₂ & H₂O。

100%Biodegradable Bag

Product Description: It can be decomposed into CO₂ & H₂O in 3 months which are buried in the earth. The product is easy to absorb the dampness, easy to be degraded by microorganism without any side-effect to the surroundings.

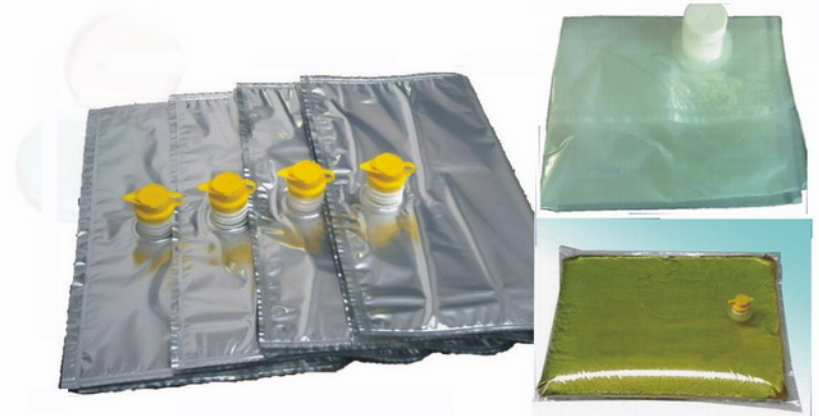

可降解塑料袋

含有生物降解添加剂的塑料薄膜具有生物降解的特性, 只要有微生物、温热、潮湿并有氧气, 塑料制品可在6-12个月时间内破裂并被分解。产品可根据客户要求添加香味。

Biodegradable Plastic Bag

Product Description: With the Additive, the PE product can be decomposed in 1 year which are buried in the earth. It is easy to absorb the dampness, easy to be degraded by microorganism. Can add the fragrance with the bag according to client's requirement.

盒中袋 (油, 红酒, 果汁包装袋)

盒中袋适用于各种食用油, 工业机油, 各类溶剂等液体产品的包装, 可以代替罐子, 瓶子。具有高抗氧化, 阻隔性好等特点, 能很好地保护产品。
材料结构: PA/PE+PE ; PE/VMPET/PE+PE
体积: 2L-22L

BIB Bag (for Oil, Juice & wine)

BIB bags (Bag in Box) are suitable for such liquid as cooking oil, machinery oil, wine, juice and various detergents.
These bags are substitutes for cans and bottles. They have such features as high oxidation resistance and good isolation performance.
Material are PA/PE+PE ; PE/VMPET/PE+PE
Volume from 2 L to 22 L

真空袋

功能: 真空袋是用尼龙 (PA) 或其他高阻隔材料采取不同的复合工艺可分别制成手感非常柔软且具有贴体性能的真空袋或挺度好耐穿刺性能极佳的真空袋。具有阻隔性好, 可耐100° C以下的水煮杀菌以及低温冷藏性好等优点。一般制作成三边封袋形式, 可增加挂孔、手挽等, 手挽的强度高。

Vacuum Bag

Vacuum bags are produced by using PA or other high insulation material with different combined processes. They can be produced into soft feeling vacuum bags or high anti puncture vacuum cleaner. It has good isolation effect and can stand up to 100 degree sterilization by boiling. It is also suitable for storage in low temperatures. It is usually sealed on three sides and hanging holes, catches can be added with high strength.
